

P170/P260

HYDROMANN

P170 - P260

Disc spreader for diverse implement carriers. The material is transferred via a transport screw to the spread disc. Because of its high dose capacity we recommend this model to clients, who spread with sand, grit or salt/sand mixes. The machine has a spread width of 1-6 meters, and the spread symmetry can be altered (Right side, left side or both sides)

Disc spreader:

- > Transport screw
- > Manual adjustment of spread symmetry
- > Manual adjustment of spread width
- > Manual adjustment of spread flow
- > Grating
