

100 - 120 EL/H

HYDROMANN

Salt and grit spreaders 100 - 120 EL/H

One of our most sold models is the traditional drop spreader, which can be mounted on various mini tractors and grass clippers. The machine is either hydraulic or electrically powered, and is available with a large selection of accessories and hitches, which makes it ideal for special customised tasks. The simple construction and durable components make the machine cheap to maintain. On the electrical spreader, a sensor protects the engine against damage from overheating.

The showing models can be with extra equipment

Salt and grit spreaders:

- ◆ Roller with replaceable cams
- ◆ Adjustable spring base
- ◆ Emptying facility
- ◆ Agitator
- ◆ Grating
- ◆ Dosage from 10-250 gr. m2
- ◆ 100EL/H painted or stainless
