SL 10/12/14

HYDROMANN

Salt- and grit spreader (Self-loaders 10/12/14)
This new hydraulic-drive range from Hydromann put functionality and flexibility first as they can be adapted to suit almost any need.
The SL models gain several new mounts, making them suitable for use on a much wider range of machines, and the hydraulic top arm puts them into the class of self-loading spreaders.
For the sake of the environment and economy, we can offer full drive-independent control and the simple, robust design makes this range inexpensive to maintain.

The showing models can be with extra equipment

Salt and grit spreader:

> Roller with changeable cams

> Agitator

> Adjustable spring base

> 3-point hitch cat.2

> Flow regulation

> Grating over agitator
